Multidisciplinary Artist and Sound  
Researcher New EP 'Sun is Dark'

Electronic music producer, visual artist, and SEU (Francisco Mujica ) has officially announced his anticipated EP, 'Sun is Dark.' Known for building complex, multisensory environments, SEU's latest work bridges the gap between digital music production and physical canvas textures, offering a deep exploration of cultural memory and structural tension.

The 'Sun is Dark' EP introduces a crafted sonic transition, initiating listeners with steady, hypnotic organic house grooves before plunging into a darker territory of deep basslines and aggressive hardware synthesizers. Rounding out the project is a bonus title track featuring a stripped-back, mellow instrumental arrangement designed specifically to evoke reflective, minimalist spaces.
